Vintage Recap

The 2020 season will be remembered for factors beyond the normal measurements. Here in the valley, it was a warm, dry winter and we didn't start to see rain and cold weather until the end of March. While the mild spring season gave us a great early start, the wineries of Napa Valley worked under extensive safety protocols due to the COVID pandemic. Summer brought very cool mornings and very warm days. The white wine harvest started in early August, the wines are showing excellent development in cellars, reflecting the fine vintage year. While the red wine harvest will be smaller than usual, wineries were able to move forward with red wine vinification. While the 2020 Napa Valley harvest proved to be one of the most challenging in history, our winemakers remain not only optimistic but committed to bottling wines of the highest quality. The story of this vintage will continue to unfold over the years to come.
